## Road cycling

### BASE CAMP IN LES GETS

Road Biking is a hugely popular sport in Les Gets. Cyclists come through the village following the Route des Grandes Alpes or, to challenge themselves, on the surrounding mythical cols of the Tour de France. Les Gets has again hosted the 6<sup>th</sup> June 2021 the Criterium du Dauphiné road race. The centre of the village has cycle lanes, GetsLib and electric bike recharging points, a wide range of cycling support services (hire shops, repair shops, road bike lessons...) and accommodation that specifically welcomes cyclists, easily recognisable by the «Escale velo» accreditation. Les Gets Tourisme was endorsed with the 'Accueil Vélo' bike-friendly accreditation in 2018. Ask Les Gets Tourisme for a copy of the Guide Cyclo Haut-Chablais detailing all the surrounding cycle routes.

**Further information available from: [www.lesgets.bike](http://www.lesgets.bike)**

## ElectricMTB (VAE)

Electric MTB in Les Gets and the Portes du Soleil. No more steep-hill worries thanks to electrically assisted mountain bikes! This summer there are 40 tracks suitable for electric mountain bikes and over 350 km of marked tracks in Les Gets and the whole of the Portes du Soleil. Electric MTBs enable everyone to enjoy a day's mountain biking with much less effort. 31 free Bosch re-charge points are spread across the area (2 of them are in Les Gets) so cyclists can recharge their batteries en route. The Portes du Soleil is the first cross-border e-bike network and a free map listing all the circuits is available from the Tourist Office. Cross frontiers and explore the French and Swiss Chablais mountains.

## Les Sources du Chéry

THE NATURAL WELLNESS  
EXPERIENCE  
**FROM 11 YS OLD**

Dedicated to wellness, treatments and massage, this new space of over 1000m<sup>2</sup> is a first in Les Gets. This rare pearl, on the slopes of Mont Chéry, invites you to become one with the elements that have made Les Gets: the water from local springs flowing naturally and the «Giets» wood, meaning in old French, from the downhill stretches of trees on the mountains.

More than a classic Spa, Les Sources du Chéry offers a concept of «natural wellness», with unique and authentic experiences in a «chic mountain» atmosphere:

- The Spa where water and wood are in harmony with steam baths, saunas, cold water tubs, a large pool with hydromassage jets and submerged benches, jacuzzi, a sensory shower, a salt lounge...
- A treatment and massage area with a warm atmosphere and rooms for both individuals and couples. Teams of professionals provide massages and facials, using methods designed with Exertier «Trésors des Alpes», a real advocate for natural, «Made in France» treatments.
- The boutique with our range of Exertier facial care products made from mountain honey or Alpine orchid, Ouate for children, and 100% natural SalySavons.

## The Perrières cheese dairy

The «Fruitière» is the place where milk is turned into cheese, where the fruit of the milk is collected, hence the word "Fruitière". Since we work with a short supply chain, we source our milk from several producers based in Verchaix, Les Gets and Avonnex and use it to make abundance, tomme, raclette and saveur des Gets cheeses, which we sell on our premises.

Every Wednesday at 10am there is a free guided tour to see the cheese being made.

# Père Delavay's botanical garden

LAC DES ÉCOLES  
AND GÉOPARC

Père Delavay, a major botanist who was born in Les Gets, was a missionary in

China 150 years ago. He sent more than 200 000 plants to the National Museum of Natural History in Paris, many of which bear his name.

The Jean-Marie Delavay association has published a book paying tribute to his role in identifying and documenting mountain plants from the Haute Savoie and Savoie departments, as well as his biography. They can be purchased from Les Gets Tourisme. To showcase the plants that

he discovered in China, within the natural setting of the lac des écoles, a botanical garden was set up in 2017, and is listed as a Conservatoire des Collections Végétales spécialisées (Special Plants Collection Conservatory). Some of these plants flourish in our gardens while many of us remain unaware that they come from so far away thanks to the efforts of a Les Gets native.

An introductory walk and an opportunity to enjoy an instructional, sensory journey with your family. You can take a tourist train excursion, based on the life of Père Delavay, every Monday. Ask for the «Become a botanist with Père Delavay» treasure hunt booklet at the Les Gets Tourisme.

# ECO-TOURISM

## The environment: a major concern for Les Gets

The Resort is committed! Les Gets resort is fully aware of the richness and fragility of the natural and human environment and is committed to protecting it. Together, we can help protect the mountain so play your part!

- Throw your rubbish in the bins provided.
- Use the free portable ashtrays, available at the ticket office and Les Gets Tourist Office.
- Only take one map for your holiday.
- Respect the areas marked out to preserve the wildlife, and stay on the marked trails and mountain bike tracks.
- Once you arrive in Les Gets, you can leave your car in the car park and either walk or take the little train, bus or Getslib' (self-service electric bikes).

## Eco-commitments

French ski resorts, which are on the front lines of global warming, are committed to helping protect the mountains with concrete measures aimed at combating climate change, reducing greenhouse gasses, improving water management and helping protect biodiversity and the natural landscapes:

<https://go.sagets.fr/Eco-engagements>

Thanks to its ecological surveys (flora, fauna, landscape), the Portes du Soleil biodiversity observatory has gained greater knowledge about the region, allowing it to make informed decisions about resort development while minimizing any environmental impact. For some years now, Les Gets resort has also been working to help preserve the region's wetlands.

Various measures have been implemented to protect the black grouse, one of the Alps' iconic bird species: special devices have been installed to improve the visibility of ski lift cables, wintering areas have been protected and other areas have been cleared to create an environment conducive to reproduction.

Systematic revegetation using specially adapted seeds subsequent to any work carried out.

A host of initiatives to protect our mountain environment.
